

DOOLY™ RUNNER

The Dooly™ design has TWO 7/16" Flat-Top® runners, each with 4", 6" or 8" of turning carbide mounted as a unit. The 4" carbide is 90° while the 6" and 8" are 60°. A pair of Dooly's™ creates four lines on the snow surface which will help decrease darting by making its own groove in the trail. Other features include hard weld at the front and a 1 1/2" carbide wear pad on the rear of each runner. The extended mounting studs will ensure solid installation on the ski.

Each Dooly™ runner is packaged & SOLD INDIVIDUALLY.

SLIM JIM® RUNNER

Performance Dooly

Slim Jim™ runners are sold individually.

The design of this runner is specifically for riders who love the reduced darting feature of Woody's original Dooly™ and also want a more performance enhanced product when cornering. Woody's® Slim Jim® is more responsive in the corners and comes in at a shopping 31% lighter than the original Dooly™.

TRAIL/TRACTION BALANCE RECOMMENDATION CHART

Consult your snowmobile owners manual or contact the dealer to determine the snowmobile's horsepower. **It is essential that you have tunnel protection**
