

INSTALLATION INSTRUCTIONS

ACT Belt Adjustor

#175-202 Right Hand Thread

#175-203 Left hand Thread

1. Remove plastic threaded plug.
2. Remove the rubber o-ring and install on ACT belt adjustor. Leave the washers on the plastic plug. You won't be using them for this product.
3. Using a 3/8 ratchet, install the threaded stub into the convertor. Be sure to tighten securely. Then install the outer Dial wheel.
4. As the Dial wheel is rotated to the right, it applies pressure to the sheave moving it inward for more belt deflection.
5. Once you have the correct deflection, tighten the small allen bolt (wrench included).

Thank you for choosing HPE for your snowmobiling needs.
