

INSTRUCTIONS

Part Number 725-182
Clutch Weight Guide Pin Tool

Insert the guide pin where the clutch flyweight bolt would start. Using the tapered end to assist centering, put the first shim then the clutch flyweight and slide the last shim in. Catch these on the tapered nose and slide the guide pin into the flyweight bolt location. Push the flyweight bolt into the hollow end of the guide pin and slide the guide pin out replacing it with the clutch flyweight bolt.
