

INSTRUCTIONS

Clutch Holding Tool - Part # 725-455 Fits: Ski-Doo Clutches

Figure 1: Typical

Latch Holding Tool over drive clutch applying downward pressure to handle end while turning the drive clutch bolt counter clockwise to remove.

NOTE: The handle end can be placed under driven pulley for added leverage while turning the clutch bolt to loosen.

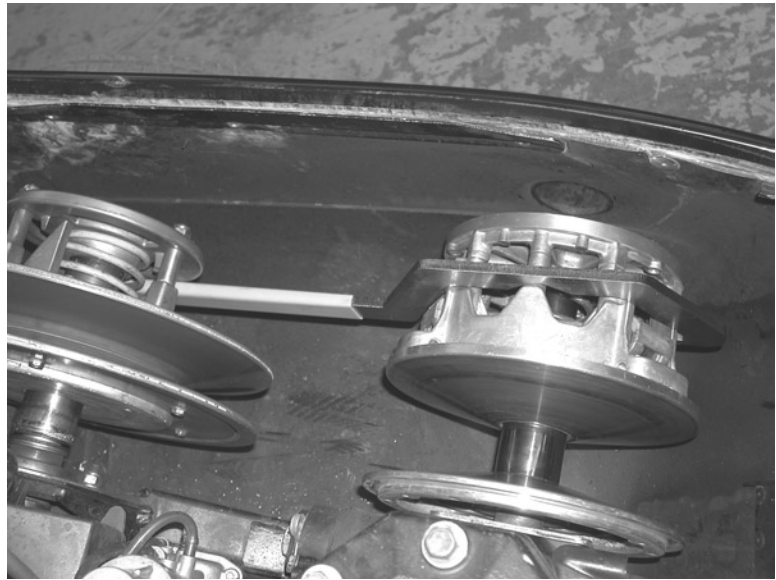

Figure 2: Typical

Latch Holding Tool under drive clutch applying upwards pressure to handle end while turning the drive clutch bolt clockwise to install.

NOTE: The handle end can be placed atop the driven pulley for added leverage while turning the clutch bolt to tighten.
