

HOOK-UP INSTRUCTIONS EGT GAUGE #900-271

Connect pin #1 to the yellow probe lead

Connect pin #3 to the red probe lead

The patch cable may be lengthened up to 20 feet using 22 ga standard wire.

Connecting the instrument to 12 volts will damage it. Connect only to the correct probe (part #900-298 or #900-299)

NOTE: Some patch cables may have black and red or black and white wire.

Thank you for choosing HPE for your snowmobiling needs.
