

9200 SERIES - ALUMINUM BODY GAS SHOCKS

- One piece extruded aluminum cylinder combines solid strength, greater gas retention & light weight performance
- Integrated ice scraper within the cylinder head assembly keeps ice off the rod, which prevents moisture from entering the shock and contaminating the oil.
- Raised valve seat piston continuously flushes discs and orifices of potential contaminants; eliminating the possibility of undesirable damping.
- Large diameter IFP o-ring increases the allowance of higher gas pressure without compromising the seal for the separation of gas and oil mixing with one another.
- Solid Teflon Piston & IFP wear bands prevents scoring of cylinder, as well as providing long life consistency in damping.
- Super finished chrome rod provides not only an improved surface finish for longer seal life but a thicker coating of chrome that is resistant to pitting and corrosion.

■ UNPARALLELED PERFORMANCE THAT LASTS!
