

# CARBIDE APPLICATION GUIDE

## FLAT-TOP® CARBIDE RUNNERS

Conventional and independent front suspension systems demand a “professionally designed” wear bar. Each model is designed specifically to meet the requirements of the particular model sled. “Woody’s carbides represent a commitment to superior performance and safety. Exclusive features include 60° carbide which is the most progressive cutting edge allowed. Quality of construction and design complement performance, safety, and reduced expenses due to additional wear. Woody’s® guarantees their products against manufacturer defects for 1 year. See warranty policy. *Specifications subject to change by the snowmobile manufacturers*

### EXTENDER TRAIL III™

- 4" of 60° carbide
- 1 1/2" carbide wear pads front & rear
- Hardweld between carbide
- 7/16" Flat Top® host bar

### TRAIL BLAZER IV™

- 6" of 60° carbide
- 1 1/2" carbide wear pads front & rear
- Hardweld between carbide
- 1/2" Flat Top® host bar

### EXECUTIVE™

- 8" of 60° carbide
- 1 1/2" carbide wear pads front & rear
- Hardweld between carbide
- 1/2" Flat Top® host bar

### ULTRA™

- 10" of 60° carbide
- Full length carbide wear pads
- 5/8" Flat Top® host bar

\*SHUR-STEER™ POLARIS For Polaris models with factory easy steer

TRACTION

### TOP STOCK™ BARS

Top-Stock™ is a hard weld runner designed for extreme service or utility applications. The 1/2" host bar with a double pass of hardweld increases the depth of the runner for improved controllability. Not recommended to replace original carbide runners for increased control or with over 48 stud installed in the track. 1/2" host bar with flat top. Sold per pair
